Does it Compute? - Conference

Thursday 30 October 2025 - Thursday 30 October 2025

Feringa Building

Programme

Page 2

Main Track

At Does it Compute we bring together practitioners, researchers, and educators to discuss the application of compute resources in their daily activities. Expect talks from practitioners about how they provide compute, sessions by researchers on the way compute powers science, and presentations by educators on how they employ compute and teach with it.

Come and enjoy a day full of insights, perspectives, and technical depth.

Afternoon Sessions

In Practice

In-depth technical sessions about how compute facilities are operated day-to-day. Expect interesting perspectives from speakers of various backgrounds.

Key Words: Operations, Cloud, Data Storage, Autonomy

in Research

Contributions from researchers on how compute powers science and research. Expect to hear about various approaches from medical sciences, to astronomy, to linguistics.

Key Words: Data Processing & Analysis, Scalable Computing, Applied Supercomputing

In Education

Talks by educators and supporters of education on how compute facilities can be applied to empower education.

Key Words: Digital Labs, Teaching with Computation, Automation
